WHAT DOES IT MEAN TO BE CREATIVE?

Anja Legolas 2019-04-10 [🗨 2](#)

'Art is what we call...the thing an artist does. It's not the medium or the oil or the price or whether it hangs on a wall or you eat it. What matters, what makes it art, is that the person who made it overcame the resistance, ignored the voice of doubt and made something worth making. Something risky. Something human. Art is not in the ...eye of the beholder. It's in the soul of the artist.'

I believe that EVERYONE is creative, or has the potential for creativity. It isn't something to be hoarded. It isn't something that one person can claim to have while dismissing another's right to it. Creativity is a natural state for every child but it often gets left behind as we grow up (Picasso certainly got that right). Some of us are able to hold onto it but most of us do not and often the ones leaving it behind do so because of criticism by adults. Sometimes it's more subtle than direct criticism. Not being chosen for a part in the play... Each of those things hurts. To discard something as beautiful and joyful and as ESSENTIAL as creativity is a terrible waste. The word does seem to be everywhere, and as someone who gets excited about encouraging creativity in others, I think that's a good thing. What isn't as good is the never-ending cast of "experts" claiming to know THE WAY to be creative. I've chatted with other artists about this, too. Building a life around creativity is hard. It's not always clear which is the right one. We make mistakes. We learn. We grow. Life is hard. But back to creativity and what is "true" creativity and what is not... I don't think any of us can judge another's creativity. And what is truly creative? What has honestly never been done before? Not a lot. Is there truly a movement a dancer can make with her body that another person hasn't made in the history of humanity? Probably not. But does that matter? Not everyone will like my paintings. Or your quilt. Or another person's book.... But that is not the point. The point is the moment of my creative act (or yours) and what it means to me (or you). I think everyone can benefit from bringing more creativity to their lives. In whatever form it might take and from whichever direction it may come. Please do not give up. Please keep shining your light.
